Portable Exhibits

pop-up displays, banner stands, and backwalls

Rental Exhibits

rent the same exhibit and digital solutions available for purchase

Digital Experiences

immersive experiences to engage attendees

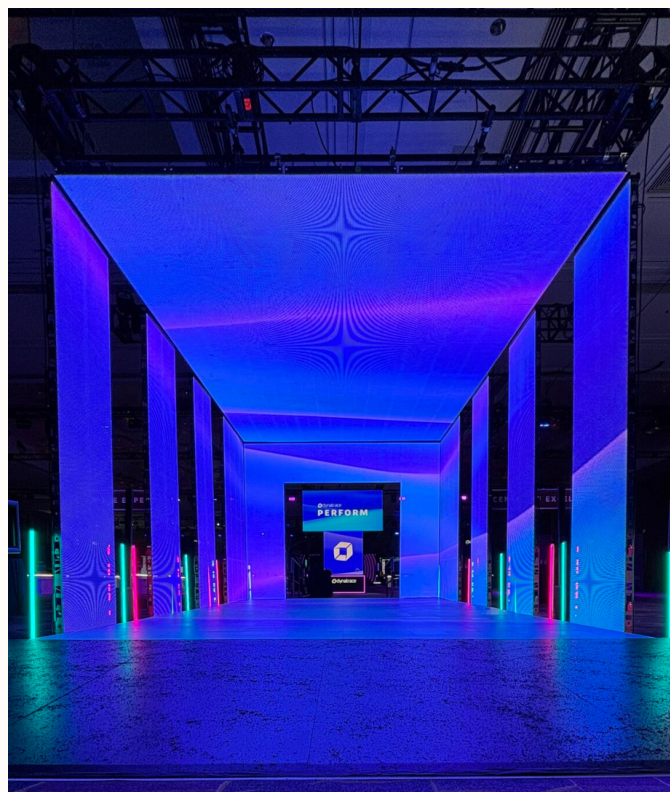

Exhibit Services

full range of services for a seamless trade show experience

Maximize Your Trade Show Impact with Stunning LED Displays

Your booth will attract the attention of the spectators at the trade show thanks to the visual appeal and impact of the effects generated by Innovative Environment's LED displays.

We specialize in creating custom LED trade show booths that engage attendees and deliver measurable results. Our comprehensive services, from innovative design to seamless installation, empower exhibitors of all sizes to make a powerful statement. These are fully *customizable*, so they have to meet the expectations for your booth, making it stand out from the competition.

What Makes Our LED Trade Show Displays Different

We can make flat LED exhibit booth walls, corners that are video walls and curved LED walls. Plus, we can do that without showing where the LED video panels fit together. What's more, we've got the newest technology on the market. Our LED trade show displays have pixels that are only 1.5 millimeters apart. What that means to you is that someone would need to stand *unrealistically* close to your LED exhibit booth to be able to see the individual pixels. Plus, most of the rental companies use older 2.8 or 2.5 millimeter LED panels. Naturally, our 1.5 millimeter panels have more pixels per inch resulting in higher resolution.

LED Inventory

1.5MM Corner Tiles

The RE cabinet and module can be cut 45 degrees at the edges then assembled together to make either a 90-degree corner or a cube.

1.5MM Flat

Crafted to perfection, these ultra-fine 1.5mm pixel pitch tiles unveil breathtaking visuals with unparalleled detail, rendering them perfect for a myriad of indoor applications.

45 Degree Concave

Concave LED displays create a visually immersive experience, drawing the viewer's attention and enhancing engagement.

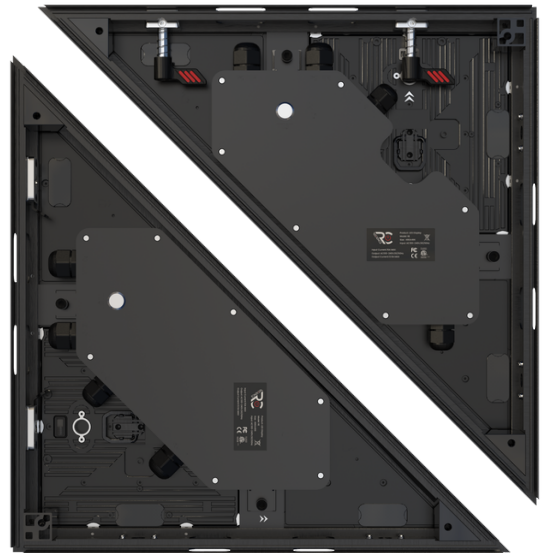

45 Degree Convex

Like concave displays, convex LED walls are typically modular. This flexibility enables you to tailor the display's shape and size to your specific booth design.

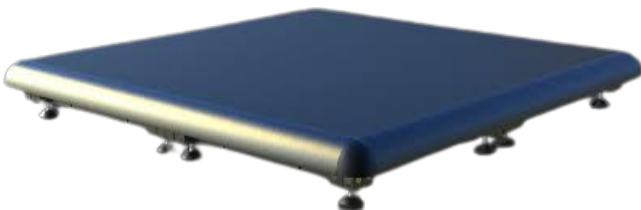

Shelf Function Module

These are excellent for highlighting specific products, drawing attention to displays, and creating a more visually appealing booth.

1.5 MM Triangle

1.5 mm Triangle is a high-resolution display solution that provides stunning visuals with remarkable details. With a lightweight design and modularity for easy installation and maintenance, it is a versatile option for eye-catching visual displays.

Floor Structure

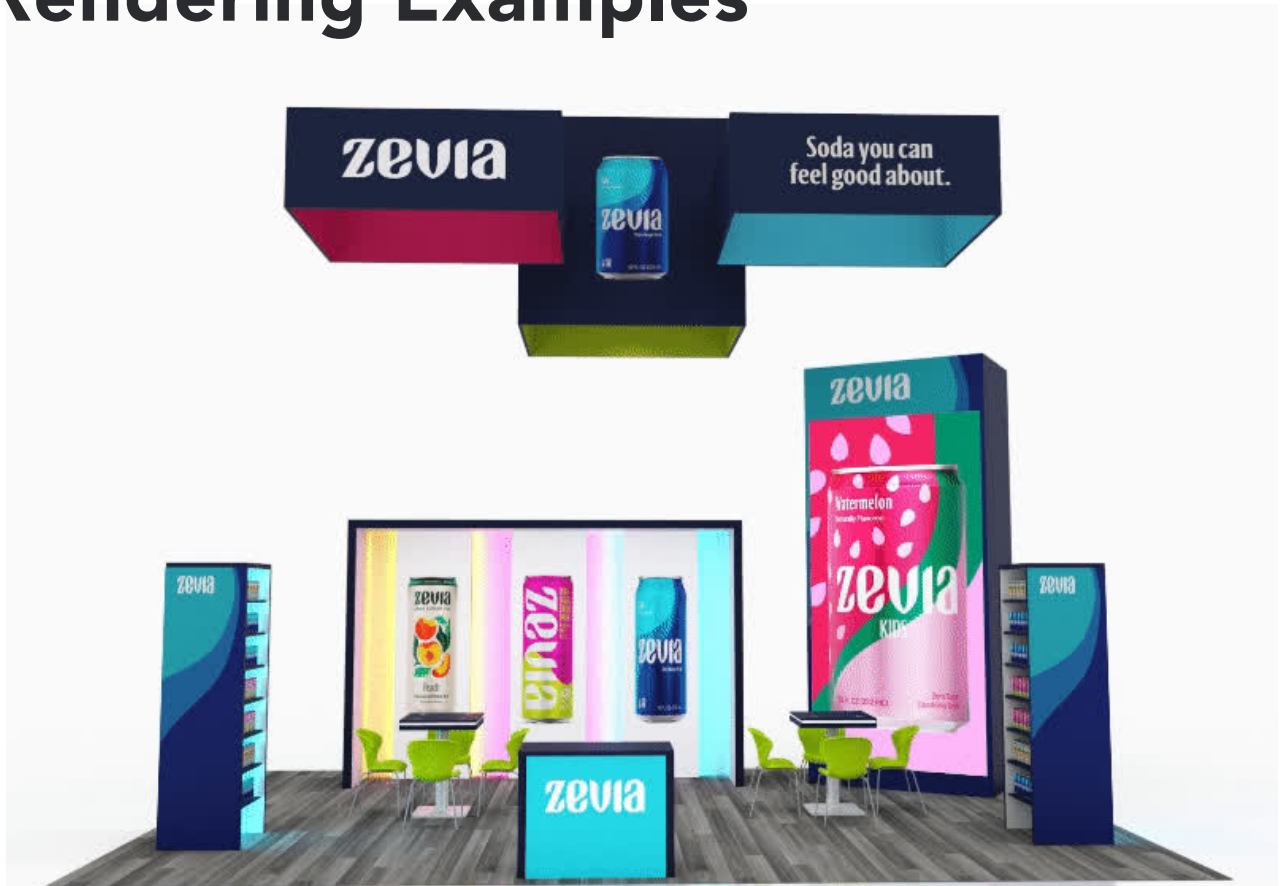

The supporting frame and interlocking mechanisms ensure a stable and even surface.

Novastar VX1000

The VX1000 is NovaStar's new all-in-one controller that integrates video processing and video control into one box.
